Experiment No. - 1

WAP that creates variables of numeric data types and perform arithmetic operations on them in Python.

Code: -

```
# Write a program to create variables of numeric Data Types and perform Arithmetic Operations on them in Python.

print("Program 1: Arithmetic Operations, Aditya Raj, 26/B04/019") # Experiment Name, Name and Roll No.

num_1 = int(input("Enter 1st no. : ")) # Prompt for 1st number and store in num_1 variable
num_2 = int(input("Enter 2nd no. : ")) # Prompt for 2nd number and store in num_2 variable

sum = num_1 + num_2           # Add numbers and store in the variable
Difference = num_1 - num_2    # Subtract numbers and store in the variable
Product = num_1 * num_2       # Multiply numbers and store in the variable
Power = num_1 ** num_2        # Power num_2 to the number num_1 and store in the variable
Mod = num_1 % num_2           # Remainder when num_1 is divided by num_2 and store in the variable
Division = num_1 / num_2      # Division Result(Float) when num_1 is divided by num_2 and store in the variable

print("Sum of",num_1,"and", num_2, "is ", sum)                # Print Sum of two numbers

print("Difference of",num_1,"and", num_2, "is ", Difference)   # Print Difference of two numbers

print("Product of",num_1,"and", num_2, "is ", Product)        # Print Product of two numbers

print("Power of",num_1,"and", num_2, "is ", Power)            # Print Power num_2 to the number num_1

print("Mod of",num_1,"and", num_2, "is ", Mod)                # Print Modulus or Remainder when num_1 is divided by num_2

print("Division of",num_1,"and", num_2, "is ", Division)      # Print Division of two numbers

Answer = (num_1 ** 3) * (num_2 ** 7) # Class Assignment
print(Answer)                # Print Answer
```

Output: -

Problems Output Debug Console Terminal Ports

```
PS C:\Users\adity> python -u "c:\Users\adity\OneDrive\Documents(1)\DTU\MC103 Python\Exp_1\Experiment_1.py"
Program 1: Arithmetic Operations, Aditya Raj, 26/B04/019
Enter 1st no. : 7
Enter 2nd no. : 4
Sum of 7 and 4 is 11
Difference of 7 and 4 is 3
Product of 7 and 4 is 28
Power of 7 and 4 is 2401
Mod of 7 and 4 is 3
Division of 7 and 4 is 1.75
5619712
```
